Experience a safer and more open world
Ameristar’s Project Solution Specialists are experienced in every facet of perimeter security design. Our goal is to assist the architectural community in finding the best perimeter & entry solutions for their projects. Ameristar’s extensive library of project photos, CAD drawings, architectural specifications & project budget quotes are just a few of the services our team offers to complete your project design.

PICKET TO RAIL PROFUSION WELDING
Each picket is welded precisely at each rail connection for ease of installation yet remaining flexible as an all terrain fence.

PANEL BRACKET
Universal Boulevard Bracket enables easy installation while allowing for adjustment of panel height and positioning.

SECURITY FASTENERS
Tee nut one-way action secures the rail and prohibits removal by typical tools.

NO VISIBLE WELDS
Profusion welding techniques are both strong and hidden from view providing a good neighbor profile.

Download specifications, drawings & other assets @ ameristarfence.com
Montage fence panels are fabricated through a WELDING TECHNIQUE that combines laser and fusion technology to create a virtually INVISIBLE STRUCTURAL CONNECTION at every picket to rail intersection. Montage welded steel construction is unmatched in strength and durability.

RAKEABLE VS STAIR-STEP

The ProFusion welded picket to rail connection is the method used to construct Montage panels, which allows a minimum biasability of 25%, eliminating unsightly stair stepping of panels.
Major corrosion problems start from the inside. That’s why all products in the Montage® family are COATED INSIDE & OUT. Our GALVANIZED STEEL FRAMEWORK is subjected to a MULTI-STAGE PRE-TREATMENT/WASH, followed by a DUPLEX CATHODIC ELECTROCOAT SYSTEM consisting of an EPOXY PRIMER, which significantly increases corrosion protection, and an ACRYLIC TOPCOAT, which provides the protection necessary to WITHSTAND ADVERSE WEATHERING EFFECTS.
Protection against corrosion starts with a proven process, which is why Ameristar emulated its PermaCoat method to develop a superior E-Coat process that protects the product with complete coverage **INSIDE & OUT**

Immersion processes coat & cleanse the inside of the fence components as thoroughly as the outside. This prevents corrosion giving Montage products the ability to withstand the elements & be maintenance free.
**MONTAGE II®**

*Built for strength yet a penchant for beauty,* Montage II is an industrial grade steel fence that delivers on both levels. *Superior welding techniques* create a profile that lends itself to landscaping design while maintaining a *level of perimeter security* that is unmatched.

INDUSTRIAL ORNAMENTAL STEEL FENCE

1"sq x 14ga PICKETS  |  1.75" x 1.75" x 12ga RAILS  |  2.5"sq x 12ga & 3"sq x 12ga POSTS
AVAILABLE HEIGHTS: 3', 3½', 4', 4½', 5', 6', 7' & 8'

Montage II gate options vary from swing gates for pedestrian or vehicle access to sliding gates for high functioning points of entry. Each of these gate systems are individually constructed to provide project specific performance.
Montage Commercial steel fences have redefined the commercial fence industry with strength that matches the level of security demanded. In the past commercial fencing was defined as a chain link fence with three strands of barbwire, today Montage Commercial ornamental fences are the standard for security fencing.
COMMERCIAL ORNAMENTAL STEEL FENCE

.75" sq x 14ga Pickets | 1.4375" x 1.5" x 14ga Rails | 2.5" sq x 14ga Posts
Available Heights: 7' & 8'

Montage Commercial gate options vary from swing gates for pedestrian or vehicle access to sliding gates for high functioning points of entry. Each of these gate systems are individually constructed to provide project specific performance.

Ameristar’s Aegis fence systems are protected to endure the elements and are maintenance free.

Ameristar’s Aegis fence systems are backed by over 30 years of excellence in the fencing industry.

Ameristar is committed to providing products that meet the Buy American Act.

Ameristar products have the opportunity to earn LEED points.

Learn more online at ameristarfence.com or by calling 800-321-8724.
The majority of Ameristar products are protected by the unique PermaCoat process. Our PRE-GALVANIZED STEEL BASE MATERIAL is subjected to an 11-STAGE PROCESS to cleanse & prepare the steel for a DUAL TOP-COAT FINISH. PermaCoat’s corrosion resistant abilities far surpass those of painted surfaces and have a “no-mar” polyester powder top coat. This dual coating not only provides RESISTANCE FROM WEATHERING but also reduces scratch & burnishing marks typically encountered during shipping.
ONCE COMPLETED, THESE 7-STAGES WILL HAVE REMOVED EVERYTHING FROM THE SURFACE OF THE STEEL THAT MIGHT INHIBIT THE FINISH FROM PROPERLY ADHERING DURING THE NEXT 4-STAGES OF THE COATING PROCESS.

Corrosion occurs more easily without the proper preparation & protection, which is why Ameristar has put our fence products to the test based on ASTM B117 standards. *The results speak for themselves.*

**NON-CROMATE SEAL**
Barrier to prevent moisture from reaching base metal

**CLEAR WATER RINSE**
Final wash in H2O to remove any excess debris or particles

**DRYING OVEN**
Eliminates all moisture prior to double coating

**CORROSION TESTING**

- **PAINTED STEEL**

(internal secured)

Aegis II gate options vary from swing gates for pedestrian or vehicle access to sliding gates for high functioning points of entry. Each of these gate systems are individually constructed to provide project specific performance.
Aegis Plus combines strength greater than most commercial steel fences with a surface finish that is essentially maintenance-free. The size of Aegis Plus works well for numerous applications where users are seeking greater strength and a more substantial look without the high cost of industrial fencing.
COMMERCIAL ORNAMENTAL STEEL FENCE

.75" sq x 17ga PICKETS | 1.5" x 1.5" x 14ga ForeRunner™ RAILS | 2.5" sq x 12ga POSTS

AVAILABLE HEIGHTS: 3', 3½', 4', 5', 6', 7' & 8' (custom heights also available)

Aegis Plus gate options vary from swing gates for pedestrian or vehicle access to sliding gates for high functioning points of entry. Each of these gate systems are individually constructed to provide project specific performance.

MPH values shown are provided for information only. They are calculated using ANSI/ASCE 7-05, “American Society of Civil Engineers Minimum Design Loads for Buildings and Other Structures” Exposure Category C (open terrain with scattered obstructions having lengths generally less than 30 feet), based on post setting in 36” deep concrete footer in soil assumed to be of mid-range strength and compaction. Since specified project conditions such as jurisdictional building codes, elevation of installation, post base/footer design, soil strength, etc., may change from project to project, a structural engineering evaluation, unique to applicable requirements and conditions, should be performed. Consult your Ameristar Service Representative for an estimate on Engineering Analysis and P.E. Certification.

FORERUNNER® LOCKING SYSTEM

INCREASED SECURITY
The ForeRunner Rail with internal retaining rod prevents the attachment from being compromised. Fasteners are not exposed.

AESTHETIC DETAILS
“Good Neighbor Design” rod follows ForeRunner centerline providing a clean and uninterrupted look void of visible screws or rivets.

RAKEABLE VS STAIR-STEP
Having a unique picket to rail connection allows Echelon products a minimum biasability of 12.5%, eliminating unsightly stair stepping of panels.
Echelon II's superior strength and durability is a result of combining top quality design components with a maintenance-free, architectural grade finish. This revolutionary fence system is comprised of aluminum posts, panels, and mounting brackets that are easily installed along any terrain.

Echelon Plus gate options vary from swing gates for pedestrian or vehicle access to sliding gates for high functioning points of entry. Each of these gate systems are individually constructed to provide project specific performance.
**HIGH SECURITY STEEL PALISADE FENCE**

**Impasse II**

Impasse II panels and posts are manufactured using high-tensile pre-galvanized G-90 steel. Each component has been roll-formed into a unique profile that yields significant strength properties. Impasse II’s distinct design enables the fence to traverse aggressive changes in grade in order to maintain security along any perimeter. Each connection point of the Impasse II system is secured with tamper-proof fasteners providing the highest level of security and versatility.

**Fabrication & Design**

- **Fastener**
  Security fastener prevents tampering or removal by typical tools

- **I-Beam Post**
  Specifically formed I-beam; pre-punched for rail attachment with pass through integrated design features

- **Post Cap**
  Cast aluminum cap adds beauty and provides closure

- **Steel Pales**
  Specifically formed high strength corrugated architectural shape resists prying or bending; bolt holes are recessed to prevent bolt head from chiseling

- **High Strength Rail**
  Specifically formed for strength through architectural shape; lower lip contoured to conceal & carry security elements such as anti-ram cabling, IDS, etc.
DESIGN INTEGRATION

The Impasse II framework is a raceway for wiring, conduits, and/or security cabling required around the perimeter of a project. This integrated design eliminates the need for costly trenching and boring becoming a value added solution for perimeter security upgrades.

When installing these security elements use Impasse II as a platform:

- Communication & Video Cables
- Intrusion Detection / Fiber Optic Cables
- Access Control Wiring
- Conduits
- Anti-Ram Cabling (Stalwart)

SAFETY ACT CERTIFIED

Developed by the US Department of Homeland Security, the SAFETY Act established a system of risk and litigation management for claims arising out of, relating to, or resulting from an act of terrorism.

Ameristar is committed to providing products that meet the Buy American Act

Ameristar’s Impasse II fence systems are protected to endure the elements and are maintenance free

Ameristar products have the opportunity to earn LEED points
Maintaining a secure perimeter is your first line of defense against potential threats. Impasse II fence systems serve as a visual deterrent backed with heavy steel components that give a higher level of protection compared to the traditional chain link or architectural mesh fence alternatives.
HIGH SECURITY STEEL PALISADE FENCE

2.75"w x 14ga PALES | 2"x 2"x 11ga RAILS | 3"x 2.75"x 12ga & 4"x 2.75" x 11ga I-BEAM POSTS
AVAILABLE HEIGHTS: 6', 7', 8', 9' & 10'

STYLE OPTIONS

ANTI-SCALE OPTION

The Impasse II Anti-Scale fence system has decreased pale spacing, which helps deter the assailant from climbing, and increases the delay time when trying to cut or pry through the fence.

COLOR OPTIONS

Impasse II gate options vary from swing gates for pedestrian or vehicle access to sliding gates for high functioning points of entry. Each of these gate systems are individually constructed to provide project specific performance.
STALWART PRODUCTS
ANTI-RAM VEHICLE BARRIERS

- STALWART OPTIMA® | FIBER ROPE ANTI-RAM BARRIER
- STALWART® | POST & RAIL ANTI-RAM CRASH BARRIER
- STALWART IS® | ANTI-RAM BARRIER + SECURITY FENCE
- STALWART II® | ANTI-RAM BARRIER + ORNAMENTAL FENCE
- STALWART PLUS® | ANTI-RAM BARRIER + ARCHITECTURAL MESH

DESIGN INTEGRATION

The Stalwart framework is a raceway for wiring, conduits, and/or security cabling required around the perimeter of a project. This integrated design eliminates the need for costly trenching and boring becoming a value added solution for perimeter security upgrades.

When installing these security elements use Stalwart Products as a platform:

- Communication & Video Cables
- Intrusion Detection / Fiber Optic Cables
- Access Control Wiring
- Conduits
- Anti-Ram Cabling (Stalwart)
Ameristar is committed to providing products that meet the Buy American Act. Learn more online at ameristarfence.com or by calling 800-321-8724.

Ameristar’s Stalwart systems are protected to endure the elements and are maintenance free.

Ameristar’s fence framework for Stalwart is backed by over 30 years of excellence in the fencing industry.

Ameristar products have the opportunity to earn LEED points.

**CRASH RATINGS**

Stalwart offers multiple anti-ram ratings. Each installation can be designed with the most appropriate stand-off distance from the assets.

- M50

- K4

**SAFETY ACT CERTIFIED**

Developed by the US Department of Homeland Security, the SAFETY Act established a system of risk and litigation management for claims arising out of, relating to, or resulting from an act of terrorism.
The Stalwart post and rail anti-ram barrier is the most economical passive perimeter barrier on the market. The Stalwart standalone design when installed adjacent to an existing perimeter fence, transforms the perimeter into a secure anti-crash perimeter system.

Stalwart Plus combines the design components of an anti-ram barrier with the industrial appearance of architectural mesh. Diverse mesh options for a varied level of security to delay with anti-cut and anti-climb properties.

**STYLE OPTIONS**

- **UPLINK**: Chain Link
- **X-SPAN**: Expanded Metal
- **WIREWORKS**: Welded Wire
Stalwart IS unites the strongest security fence available with the most widely used anti-ram perimeter barrier. The appearance of Stalwart IS is a great visual deterrent that delivers strength and fortitude for keeping any assailant from easily breaching the perimeter.

**STYLe OPTIONS**

![Stalwart IS Style Options](image)

Stalwart II integrates the design features of a traditional ornamental iron fence with the resilience of the Stalwart anti-ram barrier. The ornamental picket design blends into its surroundings, not drawing attention to itself, but still maintaining the requirements of an anti-ram barrier.

**STYLe OPTIONS**

![Stalwart II Style Options](image)
The WireWorks Plus fence system is the new standard in welded wire fencing. With this product, Ameristar has a fence solution that will reduce dependency on chain link. WireWorks Plus provides unobstructed visibility, aesthetics, and security while delivering a value added fencing solution.

**PRIMARY APPLICATIONS**

- Commercial Developments
- Parking Facilities
- Self Storage
- Parks & Recreation
- Schools & Universities
- Apartments (Multi-Family)
- Amusement Parks
- Healthcare Facilities

**AVAILABLE HEIGHTS:** 4’, 6’ & 8’

**PRODUCT FEATURES**

- COMMERCIAL WELDED WIRE STEEL FENCE
  - 6ga WIRE PANELS
  - 3" V-FOLDS
  - 2"sq x 16ga & 2.5"sq x 16sq POSTS

**PERMACOAT™ PROTECTIVE FINISH**

Our polyester powder coated steel guarantees a maintenance-free and environmentally friendly fence.
WireWorks Anti-Climb is a unique perimeter security system that maintains a guarded display of visual screening balancing the need to delay and deter an attack. WireWorks Anti-Climb combines a mesh that discourages cutting and climbing with framework that can support a total security platform.

Primary Applications

- Petroleum & Chemical Facilities
- Power Plants & Substations
- Manufacturing Plants
- Military Sites
- Government Facilities
- Airports
- Railway

Available Height: 8’ (additional heights available upon request)

10 Year Limited Warranty

Permacoated fence framework is backed by over 30 years of excellence in the fencing industry

UL 752 BALLISTIC RESISTANT LEVEL 1-8
NIJ 0108.01 BALLISTIC RESISTANT MATERIALS TYPE I-IV

UL 752 ratings of ballistic resistant materials are identified by Underwriters Laboratories as a measurable standard. NIJ Standard 0108.01 for ballistic resistant protective materials are defined by the National Institute of Justice. For more detailed ballistic ratings & levels of resistance visit www.ameristarbooths.com
Ameristar offers a variety of active and passive vehicle barriers, each with its own anti-ram rating. Our bollards, wedges & crash beams have been tested and/or engineered to a standard that best equips the product to its design parameters in order to maintain a required level of standoff distance from the asset.

WHY CHOOSE AMERISTAR

► KNOWLEDGE & EXPERIENCE
Ameristar was chartered over 30 years ago in response to the demand by consumers & specifiers for specialty fence products. Ameristar offers an aesthetically pleasing product that is both high in quality & affordability. This has been achieved by maximizing high-volume productivity, increasing product design strength, and promoting simplistic installation.

► PROVEN CAPABILITY
Ameristar's integrated in-house process & extensive raw material inventory results in much improved productivity and availability compared to the competition. By having a vast finished goods inventory, Ameristar is capable of delivering finished products faster than competitors who sublet the majority of their operations.

► INDUSTRY LEADERSHIP
Over the years Ameristar has continually raised the bar across the board in the manufacturing of high quality, innovative fencing products. Our demonstrated commitment to upholding higher values translates into superior products that go far beyond merely meeting minimum industry standards.

Ameristar's world headquarters, manufacturing & coil processing facilities in Tulsa, Oklahoma, USA.
