TransPort is a revolutionary cantilever gate system made up of three components; frame, façade and hardware. Because of its unique design, TransPort gates can be easily installed without the use of equipment or excess labor.

**Primary Applications**

- Water Treatment & Storage
- Municipal Facilities
- Government Facilities
- Airports
- Manufacturing Plants
- Petro & Chemical Facilities
- Power Plants & Substations
- Schools & Universities
- Stadiums & Event Centers
The component design of Ameristar’s TransPort Cantilever gate decreases the risk of damage during transit. The new TransPort design does not require a team of installers or machinery to install the gate frame, the cantilever gate can easily be installed with a standard three man crew in about two hours.

Unlike other engineered cantilever gates, Transport gates greater than 24’ openings come equipped with 4 internal trollies that distribute the weight of the gate as it is opened and closed.
