➤ Single Swing Openings in 8’, 10’, 12’ & 14’
➤ Flush Bottom Rail Design
  Required for automated gates to comply with ASTM F2200

Superior Finish
Major corrosion problems start from the inside. That’s why all products in the Montage family are coated inside and outside. Our galvanized steel framework is subjected to a multi-stage pre-treatment/wash (with zinc phosphate), followed by a duplex cathodic electrocoat system consisting of an epoxy primer, which significantly increases corrosion protection, and an acrylic topcoat, which provides the protection necessary to withstand adverse weathering effects.
