Safety plays the most important role in securing a perimeter. That is why Ameristar developed the Exodus Egress Gate to provide a secure perimeter with a gate solution that functions flawlessly and meets the latest safety standards. Designed for full functionality out-of-the-box, the Exodus Egress gate combines frame, gate and hardware into a complete system that is plug and play ready.

**COMPLETE SYSTEM**

The Exodus Egress Gate system mitigates multiple trips to the jobsite. This all-in-one gate system has all the required hardware pre-installed. Typical Exodus installations are complete within 3 simple steps, post setting followed by gate frame mounting, & final closer adjustment.
EXODUS®
