MONTAGE®
RESIDENTIAL ORNAMENTAL STEEL FENCE
THE MONTAGE® DIFFERENCE

LIFETIME WARRANTY

The Montage families of fencing products are manufactured from superior quality materials by skilled craftsmen with the highest standards of workmanship in the industry. Ameristar is confident in offering Montage with a Lifetime Limited Warranty (the first of its kind), backed by an American company with over 30 years of demonstrated excellence in manufacturing ornamental fencing products.

E-COAT vs PAINTED STEEL

Major corrosion problems start from the inside. That’s why all products in the Montage family are coated inside and outside. Our galvanized steel framework is subjected to a multi-stage pre-treatment/wash (with zinc phosphate), followed by a duplex cathodic electrocoat system consisting of an epoxy primer, which significantly increases corrosion protection, and an acrylic topcoat, which provides the protection necessary to withstand adverse weathering effects. This process results in years of maintenance-free ownership. Simply painting steel on the outside leaves it vulnerable to corrosion, which in turn destroys the entire fence.
Montage ornamental steel fence is unparalleled in strength and quality, adapts to virtually any terrain, withstands vast shifts in climate yet remains untouched by time in stately elegance. This fence offers an array of customizeable options to fit your unique sense of style and application.

**PROFUSION WELDED STEEL vs ALUMINUM**

All Montage fence panels are fabricated using Ameristar’s ProFusion welding process. This technique combines laser and fusion technology to create a virtually invisible structural connection at every picket to rail intersection. Unlike typical aluminum fence systems that are held together with unsightly screws, the ProFusion weld used with Montage promotes a “good neighbor” profile with sleek lines and no exposed picket to rail fasteners. When compared to residential aluminum fencing, Montage’s welded steel construction is unmatched in strength and durability.

**RAKEABLE vs STAIR-STEP**

The ProFusion welded panel design of Montage enables maximum bias for virtually all terrains. Being the only welded steel fence capable of following steep grade changes, Montage follows uneven ground contours like a second skin. This eliminates stair-stepping panels with the flexibility of a 48” rise in an 8’ run.

**ENVIRONMENTALLY RESPONSIBLE**

Ameristar proudly leads the way in manufacturing programs and practices to reduce our carbon footprint and has developed methods to reduce our energy consumption. We consistently monitor air emissions, storm water runoff, and waste water discharge. We also recycle all of our scrap steel, wood, cardboard, plastics, paper and oil products. Montage is fabricated from domestic steel that contains up to 97% recycled content.
